
“APPARATUS FOR IMPLANTING SURGICAL DEVICES FOR
CONTROLLING THE INTERNAL CIRCUMFERENCE OF AN
ANATOMIC ORIFICE OR LUMEN”

5

ABSTRACT OF THE DISCLOSURE

A system for implanting a surgical device to control the circumference of internal anatomic passages corrects physiologic dysfunctions resulting from a structural lumen which is either too
10 large or too small. Implants are disclosed which employ various means for adjusting and maintaining the size of an orifice to which they are attached. Systems permit the implants to be implanted using minimally invasive procedures and permit final adjustments to the circumference of the implants after the resumption of normal flow of
15 anatomic fluids *in situ*. Methods are disclosed for using the implants to treat heart valve abnormalities, gastroesophageal abnormalities, anal incontinence, and the like.
